Pendant Ceiling box, suitable for sloping ceilings

Recessed pendant ceiling box

Pendant ceiling box included

Circulus Pendant

Pendant suspension on three adjustable wires, wholly uniform light with attractive design, made of powder-coated steel. Simple to mount using ceiling electrical box that can be screwed on to all known ceiling outlets/electrical boxes. Terminals with option of additional looping, current sent from driver to lamp via the adjustable wires so that there are no visible power cable.

Circulus Maxi Pendant

Circulus Maxi Pendant is a round pendant luminaire with a minimalistic design, giving a beautiful, even light. The luminaire is produced in a powder-coated matt black or white steel, and can be dimmed using a DALI or phase control dimmer. We recommend LEDDim and LEDDim Smart. Ability to mount at different heights by means of the three adjustable wires. The pendant is easily fitted with a bracket that can be screwed directly into all known ceiling boxes. Visible cabling also possible.

Sense 800 Pendant

Sense 800 Pendant is a 'low profile' big rooms pendant. With a diameter of 800mm and a height of only 18mm, it looks like it's floating in the air. The minimalistic design with side lit panel gives a uniform light and a low glare at UGR<19. The luminaire is controlled by DALI. Sense 800 Pendant is suitable for raised ceiling areas such as lobbies and entrance halls, shopping malls and other retail environments. The suspension height is up to 5 m and the bayonet attachment system makes it easy to install – by one person only.

Etne

Etne is the perfect choice for storage rooms, hobby rooms and corridors, providing good light and wide light distribution. Easy installation directly in the ceiling or on the ceiling box, with loopable screwless terminal blocks and prepared for hidden or open cabling.

Etne with a PIR sensor turns the light on at movement and switches off after a chosen time, thereby saving energy. The sensor does not detect through walls or doors.The PIR sensor also features an adjustable daylight sensor that only turns on the light when it's dark. Etne with a PIR sensor can act as a master controlling up to ten other luminaires (slaves).

StripLine

StripLine is a flexible LED strip system for architectural lighting effects in ceilings, walls, niches and cabinets, for both indoor and outdoor use. It provides a premium light quality with high efficiency and great colour rendering. The LED strip is rated to IP54, has tape on the back for mounting and comes with connection cables already assembled. Lifetime 100.000h (9W/m). The LED stripe must be fitted in one of the available StripLine aluminium profiles for surface-mounted, corner, recessed or frameless installations.

It can also be used independently in indoor settings. The profiles are supplied with a solid polycarbonate front diffuser that can be easily attached and removed. The front diffuser is also supplied as a roll, providing the option of very long, continuous fronts (The diffuser on roll and the Round Diffuser are not compatible with the Slim and Soft profiles). Different driver kits are available, dimmable with phase-cut or push dim. Driver kits come complete with screwless terminal block for looping. The drivers are rated to IP20.

To control the light, use a remote control and/or pulse switch. The LEDs are positioned at very brief intervals and deliver an even light. StripLine can be cut per 3.8 cm (9w/m), 3.3 cm (15w/m) and 7.1 cm (RGBW) to customise each individual installation. When cutting, silicone should be applied to maintain water protection.

StripLine RGBW

StripLine is a flexible LED strip system designed to provide architectural lighting on ceilings and walls, in niches and cabinets, and is suitable for both indoor and outdoor use. StripLine RGBW allows you to create all the colours of the rainbow by mixing red, green and blue (RGB) in different ways. It also features pure white (W).

StripLine RGBW requires a driver and controller in order to operate correctly. To control the controller (the light), you can use a handy remote control and/or pulse switch.

The LED strip is encapsulated to an IP54 rating, and is supplied with mounting tape on the rear and connection cables already fully fitted. The LED strip must be fitted in one of the available StripLine aluminium profiles for surface-mounted, corner, recessed or frameless installations. It can also be used independently in indoor settings. The profiles are supplied with a solid polycarbonate front diffuser that can be easily attached and removed. The front diffuser is also supplied as a roll, providing the option of very long, continuous fronts (The diffuser on roll and the Round Diffuser are not compatible with the Slim and Soft profiles). Different driver kits are available, dimmable with phase-cut or push dim. Driver kits come complete with screwless terminal block for looping. The drivers are encapsulated to an IP20 rating.

StripLine RGBW can be cut at intervals of 7.1 cm to be tailored to each individual installation. When cutting, silicone should be applied to maintain water protection.

StripLine TW

StripLine is a flexible LED strip system for architectural lighting effects in ceilings, walls, niches and cabinets, for both indoor and outdoor use. Stripline TW comes in two colour temperature ranges: 2700–6500K for traditional TW with the normal circadian spectrum, of 2000–4000K for normal use in homes, including warm and cosy colour temperatures. TW allows you to regulate both the lighting level and colour temperature independently. It provides a premium light quality with high efficiency and great colour rendering.

The LED strip is rated to IP54, has tape on the back for mounting and comes with connection cables already assembled. The LED strip must be fitted in one of the available StripLine aluminium profiles for surface-mounted, corner, recessed or frameless installations. It can also be used independently in indoor settings. The profiles are supplied with a solid polycarbonate front diffuser that can be easily attached and removed. The front diffuser is also supplied as a roll, providing the option of very long, continuous fronts (The diffuser on roll and the Round Diffuser are not compatible with the Slim and Soft profiles). The LEDs are positioned at very brief intervals and deliver an even light.

StripLine TW can be cut per 5.5 cm to customise each individual installation. When cutting, silicone should be applied to maintain water protection. StripLine TW requires a driver and controller in order to operate correctly. To control the controller (the light), you can use a handy remote control and/or pulse switch.

NeoStrip

NeoStrip is an RGB LED strip, which enables creative lighting solutions both indoors and outdoors. All the colours of the rainbow can be created by mixing red, green and blue (RGB) in different ways.NeoStrip is encased in silicone and has waterproof IP65 protection. No profile or diffuser is required.

NeoStrip has a top-bending radius of 300mm, and comes with clips for fixing to the surface, making is very easy and flexible to install. It can be cut at intervals of 6.3 cm to be tailored to each individual installation. When cutting, an end cap can be mounted to achieve waterproof IP54 protection. NeoStrip requires a driver and a controller. To control the light, use a remote control and/or pulse switch.

Prelude Square

Prelude Square is a mirror luminaire with a sharp design. The luminaire provides a very homogeneous light generated by a specific LED lens technology, which makes it the obvious choice next to a mirror. Therefore, it's the ideal choice for bathrooms and similar environments. The luminaire can be dimmed by trailing edge dimming. The light output can be adjusted by dipswitch on the driver. Tunable White 2000-4000K LEDDim.

Tube Wall

5 YEARS WARRANTY

FlickerFree
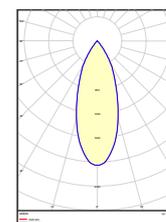

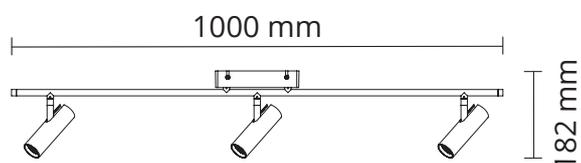

Tube Wall is a stylish wall mounted lamp with integrated dimmer and USB A+C charger. It is suitable as bed lamp for residential use as well as at hotels and hospitals. The light head is freely adjustable with a gooseneck arm. Tube Wall comes with a black bezel as standard, with low glare. Other bezels in white or gold are available as accessory. Equipment with a powerful USB charger that provides up to 3A (18W). When both ports are in use, the charger automatically distributes the power so that the device with the lowest battery level gets the most power.
